

Insurance Claim Processing and Settlement Policy

1. Purpose

This policy defines the rules for processing insurance claims, verifying documents, checking eligibility, identifying potential fraud, and deciding whether a claim should be automatically approved, rejected, or sent for human review.

2. Required Documents

Identification

The claimant must provide at least one valid government-issued ID, such as:

- **Aadhaar Card**
- **PAN Card**
- **Passport**
- **Voter ID**
- **Driving Licence**
- **Government-issued employee ID or other officially recognized ID**

The name and details must reasonably match the policyholder or authorized claimant. Authorized representatives must also provide appropriate authorization and identification.

Policy and Supporting Documents

The claimant must provide the policy number/certificate and completed claim form. Depending on the claim, required documents may include:

- **Original or digitally verifiable bills/invoices**
- **Hospital bills, discharge summaries, prescriptions, and medical reports**
- **Repair bills or estimates**
- **Purchase/ownership documents**
- **FIR or police report where applicable**
- **Vehicle Registration Certificate and Driving Licence for motor claims**
- **Photographs/videos of damage**
- **Bank details or cancelled cheque for settlement**

Bills must clearly show the service provider, date, description, amount, and invoice/bill number.

3. Claim Eligibility

A claim is eligible when:

- 1. The policy was active on the date of the incident.**
- 2. The claimant is the policyholder, insured person, nominee, or authorized claimant.**
- 3. The incident is covered by the policy and occurred during the policy period.**
- 4. The claim is reported within the applicable notification period, unless a valid delay is accepted.**
- 5. The loss is supported by sufficient documents and evidence.**
- 6. The claim does not fall under a policy exclusion.**
- 7. The claim is within the applicable coverage limit after deductibles and adjustments.**

Claims failing these conditions may be rejected with the applicable reason documented.

4. Fraud Indicators

The company will investigate potential fraud or irregularities, including:

- Altered, forged, or suspicious documents**
- Duplicate bills or claims**
- Inconsistent dates, names, amounts, or incident details**
- Unverifiable service providers**
- Inflated or unreasonable claim amounts**
- Losses occurring before policy activation**
- Repeated claims for the same loss**
- False or misleading information**
- Evidence that the reported loss did not occur**
- Major discrepancies between bills, photographs, reports, and statements**

A fraud indicator alone does not establish fraud; such claims require human investigation.

5. Automatic Approval

Claims below Rs. 10,000 may be automatically approved when:

- **The policy is active and the claim is covered.**
- **All mandatory documents are submitted and verified.**
- **Identification and policy details match.**
- **Bills and evidence are valid and consistent.**
- **No significant fraud indicators exist.**
- **The claim is within policy limits.**
- **No unresolved discrepancies exist.**

6. Human Approval and Escalation

All claims of Rs. 10,000 or more require approval by an authorized claims officer.

Human review is also mandatory when:

- **Documents are missing, unclear, or inconsistent.**
- **Fraud or document-manipulation indicators are identified.**
- **Coverage or exclusions are unclear.**
- **The claimant disputes the assessment.**
- **The claim involves unusual or complex circumstances.**
- **Additional investigation or expert assessment is required.**

The claims officer may approve, partially approve, reject, or request additional documents.

7. Rejection

A claim may be rejected when the policy is inactive, the event is excluded, the claimant is not covered or authorized, sufficient evidence is not provided, materially false information is submitted, policy conditions are not met, the loss was already settled, or investigation establishes that the reported loss did not occur.

The claimant must be informed of the rejection reason and applicable policy provision.

8. Record Keeping

All claim documents, verification results, fraud findings, decisions, and reasons must be maintained in company records for audit, compliance, and dispute resolution.

Key Rule:

Below Rs. 10,000 + complete valid documents + eligible claim + no significant fraud indicators = Automatic Approval.

Rs. 10,000 or more = Mandatory Human Approval.

Fraud indicators, missing documents, discrepancies, or unclear eligibility = Human Review.

Any claim below Rs 2000 by an applicant will be auto approved but not more than once.

Any claim having bill which is below Rs10000 and has invoice number, invoice date, claim name same as ID name, service, description, and service provider specified has to be auto approved.
